

INDION® Integrated Waste Management System ...with recovery of **Purified Water | Renewable Energy | Organic Fertilizer**

The INDION Integrated Waste Management System is an advanced process for treating liquid waste (sewage/sullage) and organic kitchen waste (generated in homes & communities), using state-of-the-art technologies such as the INDION IPC® MBR and INDION Advanced Bio-methanation process.

The above plant is designed to treat approximately 900 kg/d of organic waste generated by a community kitchen and 2 – 6 m³ of sewage sludge/d. It produces 20 KW/h of electrical energy and 1.35 tonne/d of organically rich fertilizer at full capacity. Similar modular systems are available for treating varying capacities of waste generated by hotels, residences & institutions.

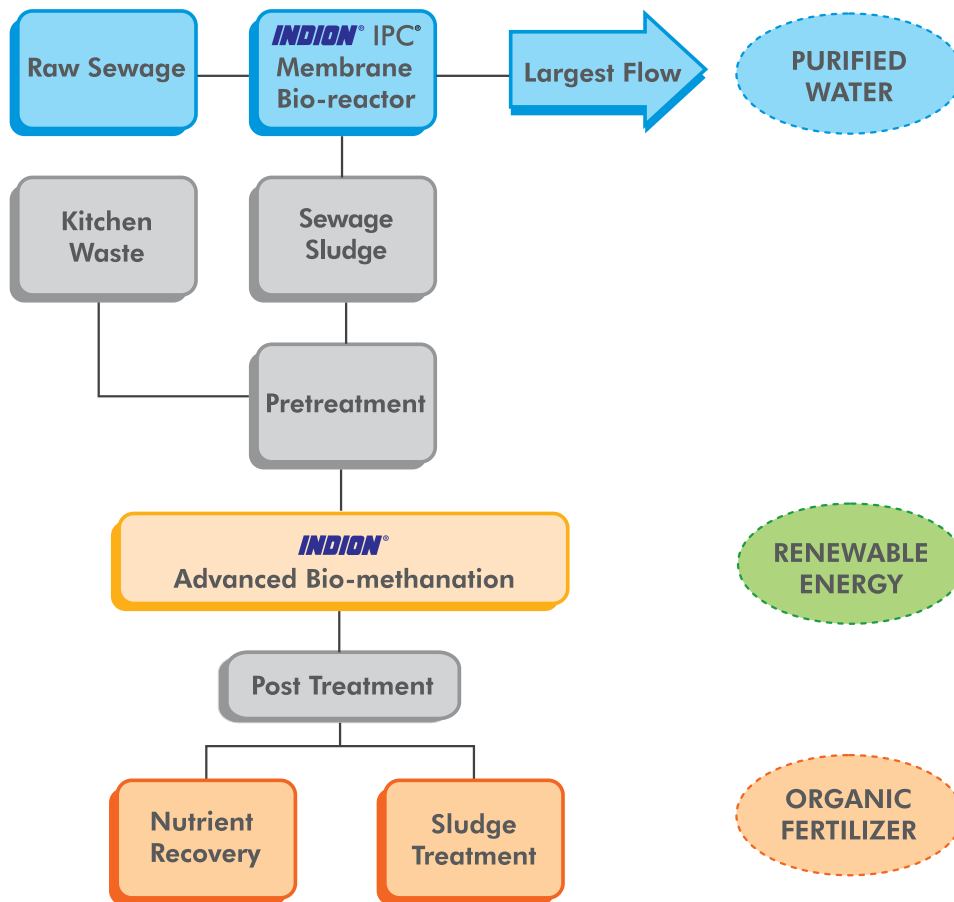

Features

- Resource recovery from liquid & solid waste
 - Purified water
 - Renewable energy
 - Organic fertiliser
- Investment payback between 3 to 5 years
- Modular system for centralised & decentralised use
- Customised & modular systems for municipal, institutions & communities to treat faecal sludge and/or in combination with organic waste

Applications

- Hotels
- Residential complexes
- IT parks
- Communities
 - Rural
 - Urban

Advanced Integrated Process for Energy Recovery through Integration of Waste Water and Organic Solid Waste
